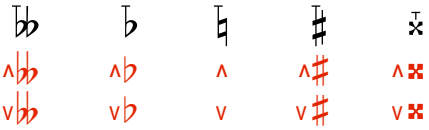
IRRATIONAL AND TEMPERED INTERVALS



notate the respective Equal Tempered Semitone;
may be combined with a cents indication to notate any pitch
^5 = up 5th = the edo's best 5th raised by one edostep
v5 = down 5th, vv5 = double-down 5th, etc.

NOTE ABOUT CENTS INDICATIONS

optional cents indications may be placed above or below the respective accidentals and are always understood in reference to Equal Tempered semitones, as implied by the Pythagorean accidentals
if the cents exceed ± 50 the closest pitch as indicated on a tuner may be written as text, e.g. F#-35

TEXT NOTATION

in addition to the accidentals, a useful text shorthand for musicians combines the prime constituents of a ratio with the symbols u and ° to indicate harmonic space coordinates: for example 7° or u11
u o z 1u
